## PROFILE

As a recent graduate with a passion for web development, I am excited to kickstart my career with a good position

## Personal Project

### E-COMMERCE WEBSITE

Created an ecommerce platform demonstrating proficiency in web development, UI/UX design, and database management. Implemented key features including product catalog, shopping cart.

#### Features

- Login / Signup : user can create account and login to access
- Search product : user can search product and review to buy  
Add to cart / Order : user can add product or order the product
- Responsive design: the website will adapt to different screen size

#### Technologies Used

- HTML: For building the user interface and managing state.
- CSS: To create a clean modern user interface design.
- JAVASCRIPT: for function in website

#### Implementation steps

- Project Setup:
  - Initialize a new project file
  - Set up necessary dependencies (e.g. Html, Css, Javascript files )
- Components Creation:  
Developed components for searching product and review the product and add to car and order pages .
- User Interface:
  - Designed a user-friendly interface using Html, Css, Javascript .

Apart of this i have some group projects at my college like (Digital car parking syatem, Crime management system)

## SKILLS
